

# NOV

## My 2020 Planner

You've got your course — now start working on your learning goal with your **2020** plan. Start with **20** minutes of learning for **20** days, and you'll total **400** minutes in a month. That's just **5** days a week — so you can take two days off. Use the attached calendar to plan it all out.

### Here's how it works

- Step 1. Write down your learning goal
- Step 2. Schedule your learning days
- Step 3. Follow your plan

Just visualizing how you can carve out a little learning time each day can help you accomplish your 2020 goals.
